

**PLANNING BOARD REVIEW
ELIGIBLE FACILITY REQUEST**

Applicant: AT&T

Project Site: 139 Rombout Avenue

Description: Applicant has submitted an application to modify an existing wireless tower [tower or base station] that involves:

- | | |
|---|---|
| X | Collocation of new transmission equipment |
| | Removal of transmission equipment |
| | Replacement of transmission equipment |

Does the request substantially change the physical dimensions of the eligible support structure?

Substantial Change Criteria	Application Details
For towers other than towers in the public rights-of-way, does the application increase the height of the tower by more than 10% or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed twenty feet? For other eligible support structures, does the application increase the height of the structure by more than 10% or more than ten feet?	The installation of new transmission equipment will not increase the height of the tower or change the dimensions of the equipment compound. <i>See</i> Sheet C4, Elevation View.
For towers other than towers in the public rights-of-way, does the application involve adding an appurtenance to the body of the tower that would protrude from the edge of the tower more than twenty feet, or more than the width of the tower structure at the level of the appurtenance? For other eligible support structures, does the application involve adding an appurtenance to the body of the structure that would protrude from the edge of the structure by more than six feet?	The application does not involve adding appurtenances to the body of the tower that would protrude from the edge of the tower more than twenty feet, or more than the width of the tower structure. <i>See</i> Sheet C2, Overall & Enlarged Site Plan and Sheet C4, Elevation View.
For any eligible support structure, does the application involve installation of more than the standard number of new equipment cabinets for the technology involved? For towers in the public rights-of-way and base stations, does the application involve the installation of any new equipment cabinets on the ground if there are no pre-existing ground cabinets associated with the structure, or else involve installation of ground cabinets that are more than 10% larger in height or overall volume than any other ground cabinets associated with the structure?	No new equipment cabinets or ground cabinets are proposed. <i>See</i> Sheet C2, Overall & Enlarged Site Plan.
Does the application entail excavation or deployment outside the current site?	The application does not entail any excavation or deployment outside the site. <i>See</i> Sheet C2, Overall & Enlarged Site Plan.
Does the proposed application defeat the concealment elements of the eligible support structure?	There are no concealment elements on the existing tower. <i>See</i> Sheet C4, Elevation View.
Does the proposed application comply with conditions associated with the siting approval of the construction or modification of the eligible support structure or base station equipment?	AT&T's application to install new transmission equipment also complies with all conditions associated with the original approval of the eligible support structure. (Need to confirm)
