

## **MEMORANDUM**

**TO:** Chairman John Gunn and Members of the  
City of Beacon Planning Board

**FROM:** Dave Buckley, City Building Inspector

**RE:** Eligible Facility Request  
139 Rombout Avenue

**DATE:** May 13, 2019

---

AT&T (the "Applicant") has submitted an application to make certain equipment upgrades at the existing telecommunications facility located at 139 Rombout Avenue. The Applicant states that such application is an "eligible facility request."

Under Section 223-26.4.C(2) of the City of Beacon Zoning Code, an application for an eligible facility request must be reviewed by the Planning Board to determine whether such application is appropriately characterized as an "eligible facility request," as defined by the FCC and the City of Beacon.

Based on my review of the materials provided in the application, the proposed application to install new transmission equipment on the existing tower located at 139 Rombout Avenue will not substantially change the dimensions of the existing tower. I have prepared the following attached chart to assist the Planning Board in its review.

The Planning Board should deem this application an eligible facility request.
