Hello Mike,

Based on your air photos and other information, I'm satisfied that the archaeological potential is low. I will rescind my request for a IA. Please remember that the project is also being review by our architectural staff.

Philip

Good morning Philip,

I am circling back to see if you have had a chance to review the supplemental submission in response to your comments. I uploaded historical photos of the site dating back to 1936. The photos demonstrate that the site has been disturbed in the past and that there were former buildings that have been removed as well as below ground existing utilities.

We are trying to get SEQR closed on this project and our timeline is tight. Therefore, I need to know if we need to prepare a Phase 1A sooner than later so we have enough time to prepare and provide to you.

Please let me know your schedule at your earliest convenience.

Thank you,

Mike

Thank you Philip. I did have difficulty uploading additional pictures yesterday. I will try again now to see if it works.

Mr. Bodendorf,

Thanks for checking. That link/token is only to upload archaeological reports. All other materials may be uploaded as unrequested attachments – open CRIS, click “Submit”, enter your email address and the project number. You are submitting new information for an existing project. You may submit as many attachments as necessary, but each file must be less than 30 MB.

We’re currently having some CRIS difficulties. So, you may have to try again later if it doesn’t work the first time.

Philip

Mr. Perazio,

I am in the process of trying to upload historical photos of the 23-28 Creek Drive site currently being evaluated through the CRIS website. When I proceed with “process” button under your request, it is set up for a Phase IA to be uploaded. Before I do that, I wanted to reach out to you for advice on what to provide. I have Beth Selig from Hudson Valley Cultural Resources on the ready to perform a Phase IA for the parcel, but just want to make sure that it is necessary before we do so.
