**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the west side of Fishkill Avenue on a 0.2-acre lot. It is a 1½-story building with a multi-gabled roof, brick chimney, and an extraordinary level of Victorian detailing, especially for a modestly scaled house. The first story has horizontal clapboard siding and the second level has vertical board and batten siding. There are two east-facing dormers with rounded hoods.

There is a projecting one-story bay on the western corner with raised panels below the windows. The cornices over the front porch and corner bay are highly decorated with brackets and a frieze pattern that extends along the north and south walls. The chamfered porch posts have elaborate cut-out corner brackets that extend to central pendants. The heavy porch railings have turned balusters. There are two French doors onto the porch, as well as a double-door front entrance with transom window.

The decorative details on the house are emphasized by a multi-color paint job.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A smaller house appears at this location on the 1867 and 1876 Atlas maps, listed as E. Chace, but the current configuration with a front porch is first accurately represented on the 1889 Sanborn map.

The building retains its original character with a mix of Gothic and Italianate features. This elaborately decorated house is one of the most intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the west side of Fishkill Avenue on a 0.3-acre lot. It is a 2½-story building with a cross gable roof, front-facing dormer, and two central brick chimneys. The 1979 Historic Survey shows a highly decorated vergeboard, bracketed bay window, and elaborately detailed front porch supports and balustrade. However, the current building has been covered over with vinyl siding and all the former architectural details are gone. The first-level bay window on the front and a wraparound porch on the north side still exist, but without any decorative elements. There is a raised deck and one-story garage to the rear.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

This house is first represented on the 1889 Sanborn map with its front bay window and front porch extending around the north side. On the rear of the lot is a 3-story structure listed as James Forrestal, carpenter and builder. By the 1919 version, the 3-story shop is no longer evident, but a 2-story carpenter and auto building is along the northern parcel line to the rear. On the 1927 Sanborn map an additional 1-story building labeled James Forrestal, General Contractor, is to the rear, along with a grouping of other buildings extending over to Eliza Street. By 1946, the rear building is listed as a Hat Bin Manufacturer.

Although the house has lost almost all its architectural details since the 1979 Historic Survey, the building is associated with a historic person in national history, James V. Forrestal (1892-1949). He was born here and graduated from Matteawan High School at the age of 16. A naval aviator in WWI and Wall Street executive between the wars, Forrestal's friendship with Franklin D. Roosevelt led to his appointment as Undersecretary of the Navy in 1940 and Secretary of the Navy in 1944. He is noted for his effective mobilization of the war effort, his advocacy for racial integration in the military, and, after the war, a strong national defense. Forrestal was appointed the first Secretary of Defense by President Truman in 1947, but disagreed with Truman over the military budget and other political issues and was forced to resign in 1949. He fell into depression and either fell or jumped to his death from a hospital window two months later. An aircraft carrier, a major office building in Washington DC, and an elementary school in Beacon were subsequently named after him.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of Fishkill Avenue on a 0.23-acre corner lot. It is a 2-story building with a hip roof, two cross gables, and a central brick chimney. The basement level has a rusticated cement block foundation. There is a 2-story, three-sided bay with paired central windows facing Verplanck Avenue.

The clapboard siding and shingled gables noted in the 1979 Historic Survey have been covered over with vinyl siding. As a result, the most notable architectural features are the three street-front porches with flat roofs, Tuscan columns, and straight balusters. The porch facing the intersection has a doorway set in an angled corner.

There is a small garage, probably from the 1920s, on the eastern rear side of the house and a stone retaining wall along the Fishkill Avenue sidewalk.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

This house is shown on the 1904 Sanborn map, although the porches in their current configuration first appear in the 1927 version.

Even though the house has been resided with vinyl siding since the 1979 Historic Survey, the building retains much of its original character, especially the porches. This Queen Anne/Colonial Revival structure is one of the more intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of Fishkill Avenue on a 0.19-acre lot. It is a 2-story brick structure with a flat roof. It is well above the street, accessed by central steps with a concrete retaining wall along the sidewalk.

The façade features a raised parapet roofline with a Star of David just below and three tall stained-glass windows. These windows are topped by arched stone elements with central keys and stone sills with supporting blocks below. Two smaller stained-glass windows flank the front entrance with arched brick lintels and stone sills. The brick entrance surrounds project out from the facade with a stone shallow arch above and the name of the building inscribed along the top edge. Two paneled wood doors have a transom window above and lantern lighting fixtures on both sides.

There is a modern 1-story addition on the south side and the brick under the top edge of the structure has been re-pointed with a lighter shade of mortar.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

The building was constructed in 1929, according to a stone block on the front corner. It is not shown on the 1927 Sanborn map, but is evident on the 1946 version, listed as the Hebrew Synagogue and Center.

This religious structure is one of the most intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the west side of S. Chestnut Street on a 0.17-acre corner lot. It is a 1½-story brick structure with a gable roof and rear chimney. The raised basement level has a stucco exterior.

The façade features polychrome brick that imitate quoins on the front corners. A band of light-colored soldier bricks and stucco cross under the front gable. This reinforces the projecting pediment with modillions and flanking polychrome brick columns around the front entrance. An arched stucco panel with a central key and inscribed St. Rocco Society is above the double doors. The side walls have buttresses between the windows, which have soldier brick lintels and stone sills.

The windows appear to be modern replacements and the front stairs, metal railings, and overhead canopy are likely newer construction. Four windows on the rear wall have been bricked over. There is also a 1-story shed addition on the rear side.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

This Classical Revival building was constructed in 1926, according to a stone block on the front corner. It is first shown on the 1927 Sanborn map, listed as the St. Rocco Society Hall. In the 1946 version it is labeled as both the St. Rocco Society and a clothing factory.

This social club structure with religious and Italian-American associations is one of the most intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the south side of Commerce Street on a 0.11-acre corner lot. It is a 2½-story wood-frame structure with a cross gable roof that has an unusual flat center section and a central brick chimney. To the rear the house drops down to two stories with a flat roof. The gable ends have decorated vergeboards with applied diamonds and circular cut-outs. Parts of the existing asphalt siding have been covered over with new vinyl siding.

The rear section, front porch, side porch, and 2-story rectangular bay window facing Cliff Street all feature the same repetitive cutwork pattern along the top edges. The porch posts have lightweight crosshatching and double-arch brackets, while the porch railing supports have both crosshatch and straight pieces.

The front upper-floor windows have shed hoods with small corner brackets. All the window sashes appear to be modern replacements, but the front door and side lights seem to be original.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

This house is first shown on the 1884 Sanborn Map. The street connecting Cliff Street with South Avenue did not exist on the 1876 Atlas Map, but it is shown on the 1884 Sanborn Map and is labeled as Spring Street in 1889. By 1919, it was known as Commerce Street.

Although the siding is not original, this Victorian house is one of the more intact examples of its type, scale, and period in the City, particularly in its decorated cornices and porches. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the south side of Commerce Street on a 0.43-acre lot. It is a 2-story brick building with a flat roof and brick chimney. The house is surrounded by a metal fence with brick piers flanking the walkway and driveway entrances, as well as overgrown plantings, so it is difficult to see the building from the street for an accurate description.

The roof line features a broad overhanging eave and wide frieze board without brackets. There is a one-story bay window on the west side towards the rear. The windows have stone lintels and sills with 6 over 6 sashes. The porch across the front of the house has a simple shed roof. The double front doors have arched windows with raised panels below.

There is a one-story garage with a gable roof on the west side of the house that first shows up on the 1919 Sanborn Map.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A house existed at this location on the 1867 and 1876 Atlas maps, labeled as H. H. Hustis. According to Smith's 1882 History of Dutchess County, Henry H. Hustis was an attorney who opened an office in Fishkill Landing in 1853. He was listed as President of the incorporated village in 1866, 1868, 1870, and 1873. The house with its front and rear porches is first accurately represented on the 1884 Sanborn map. The street connecting Cliff Street with South Avenue did not exist on the 1876 Atlas Map, but it is shown in 1884 and is labeled as Spring Street in 1889. By 1919, it was known as Commerce Street.

This Italianate house retains its original character. It is one of the most intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of South Avenue on a 0.54-acre uphill lot with a cobble stone retaining wall along the front sidewalk. It is a 2½-story building with a mansard roof, brick chimney, and metal rooftop balustrade. The 1½-story addition to the rear also has a mansard roof, while the somewhat later 1-story addition to the south has a flat roof. There are gabled dormers with decorative cutwork around both mansard roofs. The second-floor cornice has brackets and a broad stucco band below. The second-floor windows are 2 over 2 with stone lintels and sills.

The elaborately decorated porch, which extends across front and south side, has a bracketed cornice, square columns with capitals, cut-out arches with central pendants, and turned balusters. The front double doors have glass panels and a transom window.

A large modern addition with a horizontal siding and a combination shed and gable roof has been built on the north side to the rear.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A house appears at this location on the 1867 and 1876 Atlas maps, listed as Jas. Taylor, but it is first accurately represented with a front porch and mansard roof on the 1884 Sanborn map. A 2-story rear addition appears on the 1904 map. In 1912 a 1-story addition was built of the south side to the rear, along with an extension of the front porch around the side of the building.

The building retains its original distinctive character, particularly its Second Empire roof and elaborately decorated wraparound porch. This house is one of the most intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of South Avenue on a 0.37-acre uphill lot with a concrete retaining wall along the front sidewalk. It is a 2½-story building with a 1½-story southern section, multi-gabled roof, two brick chimneys with pots, and a raised basement level. The southern section features gable-hooded dormers with trefoil windows. There is an original 1-story section to the rear on the south side and a more modern 2-story addition to the rear on the east side.

The front-facing gable has a wide vergeboard with elaborate cut-outs, pinnacle above, and a window and balcony below. The first floor in front has a canopy roof, two French doors, and an elevated porch with large projecting supports. There is a one-story bay window on the north side. The porch curving around the southern section of the house has lightweight columns and bracketed supports. Parts of the original balusters have been replaced. The double front doors have glass panels and a transom window.

To the rear, there is a 1½-story carriage house with board and batten siding and a wide decorated vergeboard.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A house appears at this location on the 1867 and 1876 Atlas maps, listed in 1867 as S. Bogardus, but the house and rear structure are first accurately represented on the 1884 Sanborn map.

This Gothic Revival house retains its original character and decorated features. It is one of the most intact examples of its type, scale, and period in the City. This structure possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of South Avenue on a 0.42-acre lot with a tall hedge and chain link fence along the sidewalk. It is a 2½-story building with a multi-gabled roof, and two brick chimneys. The most distinctive features are the wide vergeboards with a repeating square pattern, cut-outs, and central drop pendants.

There are 1-story bay windows on the south and west sides and a 2-story bay on the north side. The cornice brackets remain on the northern bay. The windows have arched wood frames, but some of the 2 over 2 sashes have been replaced.

The front porch curves around to the south side. It has chamfered columns and arched supports with corner cut-outs. The front doorway appears to be a modern replacement.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A house appears at this location on the 1867 and 1876 Atlas maps, listed as E. Crosby, but it is first accurately represented on the 1884 Sanborn map.

Other than the vinyl siding and front doorway, the building retains its original character. This house with its elaborately decorated vergeboards is one of the more intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.

Prepared by: John Clarke address 25 Beech Street, Rhinebeck, NY 12572

Telephone: \_\_\_\_\_ email [jclarkeplandesign@gmail.com](mailto:jclarkeplandesign@gmail.com) Date June 2019

**Narrative Description of Property:** Briefly describe the property and its setting. Include a verbal description of the location (e.g., north side of NY 17, west of Jones Road); a general description of the building, structure or feature including such items as architectural style (if known), number of stories, type and shape of roof (flat, gabled, mansard, shed or other), materials and landscape features. Identify and describe any associated buildings, structures or features on the property, such as garages, silos, privies, pools, gravesites. Identify any known exterior and interior alterations such as additions, replacement windows, aluminum or vinyl siding or changes in plan. Include dates of construction and alteration, if known. Attach additional sheets as needed.

The building is located on the east side of South Avenue on a 0.31-acre corner lot with a hedge and chain link fence along the sidewalk. It is a 2-story painted brick building with a multi-gabled roof and a brick chimney. The gables have a shallow pitch with a return on the west side. The cornices feature regularly spaced brackets. There is a 2-story bay on the south side with a matching bracketed cornice and shingle siding. The bay is first shown on the 1919 Sanborn Map.

The windows have stone lintels and sills, but appear to have replacement sashes. A smaller set of paired windows under the western eaves has a distinctive diamond glazing pattern. A small, similarly shaped window with a diamond glass pattern also exists on the southern wall next to the bay.

The front porch on the west side has a bracketed top and chamfered columns, but the balustrade has been covered over with solid shingles. There is also a 1-story, shed-roofed rear entrance on the east side that likely dates from the early 1900s and a more modern 1-story addition on the north side with a flat roof, clapboard siding, and a triple window facing South Avenue.

**Narrative Description of Significance:** Briefly describe those characteristics by which this property may be considered historically significant. Significance may include, but is not limited to, a structure being an intact representative of an architectural or engineering type or style (e.g., Gothic Revival style cottage, Pratt through-truss bridge); association with historic events or broad patterns of local, state or national history (e.g., a cotton mill from a period of growth in local industry, a seaside cottage representing a locale's history as a resort community, a structure associated with activities of the "underground railroad."); or by association with persons or organizations significant at a local, state or national level. Simply put, why is this property important to you and the community. Attach additional sheets as needed.

A house exists at this location on the 1867 and 1876 Atlas maps, listed as E. Crosby in 1867, but the current configuration with a front porch is first accurately represented on the 1884 Sanborn map.

The building retains its original character. This bracketed house is one of the more intact examples of its type, scale, and period in the City. It possesses special historic and aesthetic value as part of the cultural history of the City and embodies distinguishing characteristics of an architectural period and style.
