

The Redi-Rock® Cobblestone texture is available on any Redi-Rock block. This gives you endless possibilities to create a complete wall solution for your project.

REDI-ROCK TEXTURE:

COBBLESTONE

Calling all blockheads! Redi-Rock Cobblestone blocks feature a double-whammy—engineering ingenuity *and* dashing good looks. The result is the best looking structural walls on the market.

Cobblestone blocks have a great stacked stone aesthetic. Each one-ton block features the appearance of six smaller blocks, making it a great look for projects that need a smaller-scale look.

Cobblestone Block Specifications

- Stacked stone texture
- 5.75 square feet (0.5 square meters) of face
- Four unique faces to give walls a random aesthetic
- Up to 23 square feet (2 square meters) of non-repeating texture available
- Wet-cast concrete gives a greater level of detail and durability

Regional colors and coordinating accessories are available. Contact your local Redi-Rock retailer or visit **redi-rock.com** to learn more about the Redi-Rock Cobblestone face today!

COBBLESTONE CASE STUDY

Redi-Rock Gravity Walls Level Lot for Custom Sports Court

The Challenge

When the owners of this Washington home wanted to install a tennis/basketball court, their hilly property presented some unique challenges. To create enough space for a court, they needed to contend with a 20-foot (6 meter) elevation change on the proposed site.

The Solution

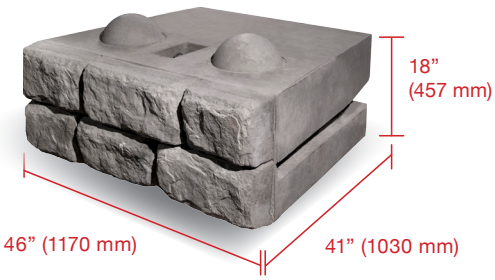

Copper Creek Landscaping considered several options with the owners, including a poured-in-place wall.

"We just thought [a poured-in-place wall] would be too sterile and not aesthetically pleasing," explained Matt Barton, owner of Copper Creek Landscaping.

"We wanted really straight, square walls though, so obviously a boulder retaining wall wouldn't have worked. We had a lot of restrictions with what we were trying to do, and Redi-Rock was the perfect product that allowed us to do everything we needed to do," said Barton.

The biggest selling point of the Redi-Rock system was the ability to build retaining walls without requiring geogrid. After re-grading the area, the tallest wall required was still 11 feet (3.4 meters) and was installed as a gravity structure. This saved installers time because they did not have to excavate for geogrid, in turn saving the owners money. Plus, the aesthetic Cobblestone texture complimented the nearby home.

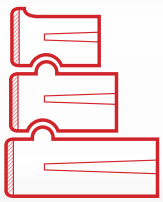

"We really liked the aesthetics of Redi-Rock because it blends in nicely with the surrounding terrain. We worked with Wilbert to do the custom work and they did a great job. We are really pleased with how it turned out—and we know it's not going anywhere," said owner Jeff Stockdale.

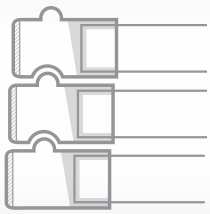

5.75 square feet of face - 2310 pounds
(0.5 square meters of face - 1050 kilograms)
