Short Environmental Assessment Form Part 1 - Project Information

Instructions for Completing

Part 1 - Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

Part 1 - Project and Sponsor Information				
Name of Action or Project:				
City of Beacon Local Law concerning Small Cell Wireless Telecommunication Facilities	i			
Project Location (describe, and attach a location map):			*****	
City of Beacon				
Brief Description of Proposed Action:				
The proposed Local Law creates Section 223-26.4 of the Code of the City of Beacon to regulate Small Cell Wireless Telecommunication Facilities. The purpose of the Local Law is to establish uniform policies and procedures for the deployment and installation of small cell wireless telecommunication facilities in the City of Beacon. The Local Law provides that no person shall install a small cell wireless telecommunication facility without first filing a small cell wireless telecommunications facility application and obtaining a small cell permit from the Planning Board.

Narrative of Purpose for Legislative Enactment of "Local Law to create Chapter 223, Section 26.4 of the Code of the City of Beacon, concerning Small Cell Wireless Telecommunication Facilities"

Short Environmental Assessment Form – Question #1

The purpose of the Local Law is to establish uniform policies and procedures for the deployment and installation of small cell wireless telecommunication facilities in the City of Beacon, which will provide a public health, safety and welfare benefit consistent with the preservation of the integrity, safe usage, and visual qualities in the City. The Local Law provides that no person shall install a small cell wireless telecommunication facility without first filing a small cell wireless telecommunications facility application and obtaining a small cell permit from the Planning Board. The Local Law sets forth locational priorities regulating where small cell wireless telecommunication facilities may be located to create the least amount of adverse aesthetic impacts and to preserve the scenic values of the City. The City hopes to preserve the character and integrity of City neighborhoods by the regulations set forth in the Local Law.

Short Environmental Assessment Form Part 2 - Impact Assessment

Part 2 is to be completed by the Lead Agency.

Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept "Have my responses been reasonable considering the scale and context of the proposed action?"

	·	No, or small impact may occur	Moderate to large impact may occur
1.	Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	✓	
2.	Will the proposed action result in a change in the use or intensity of use of land?	✓	
3.	Will the proposed action impair the character or quality of the existing community?	V	
4.	Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?	V	
5.	Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?	V	
6.	Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?	V	
7.	Will the proposed action impact existing: a. public / private water supplies?	V	
.,,	b. public / private wastewater treatment utilities?	√	
8.	Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?	V	
9.	Will the proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?	V	
10.	Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?	V	
11.	Will the proposed action create a hazard to environmental resources or human health?	✓

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

See attached.

that the proposed action may result in one or more pot environmental impact statement is required.	·

Negative Declaration

"Local Law to create Chapter 223, Section 26.4 of the Code of the City of Beacon, concerning Small Cell Wireless Telecommunication Facilities"

The purpose of the Local Law is to establish uniform policies and procedures for the deployment and installation of small cell wireless telecommunication facilities in the City of Beacon, which will provide a public health, safety and welfare benefit consistent with the preservation of the integrity, safe usage, and visual qualities in the City. The Local Law provides that no person shall install a small cell wireless telecommunication facility without first filing a small cell wireless telecommunications facility application and obtaining a small cell permit from the Planning Board. The Local Law sets forth locational priorities regulating where small cell wireless telecommunication facilities may be located so as to create the least amount of adverse aesthetic impacts and to preserve the scenic values of the City. If a proposed small cell site is not located in a high priority location, then a detailed explanation must be provided explaining why a site of higher priority was not selected. Such high priority sites include roofs of any City owned or federal, state or local government owned buildings or structures. The applicant must satisfactorily demonstrate the reason or reasons why such a permit should be granted for the proposed site and the hardship that would be incurred by the applicant if the permit were not granted for the proposed use.

The regulations set forth in the Local Law will preserve the character and integrity of City neighborhoods. In its review of a small cell application, the Planning Board will consider all impacts to site lines and aesthetic views that may be affected by the installation of a small cell wireless telecommunication facility. The Planning Board will be able to evaluate each application to assess and minimize the impacts, and may condition any approval. The Local Law also prohibits the installation of new small cell facilities in the Historic District and Landmark Overlay Zone, and requires that all small cells placed on any roof shall be set back at least 15 feet from the edge of the roof along any street frontage.

The law also sets forth specific right-of way regulations and fees. All new utility pole or wireless support structures installed in the public right-of-way must be 50 feet in height or less. Furthermore, each new small cell wireless telecommunication facility, including antennas or other associated equipment, installed in the public right-of-way, may not exceed more than ten (10) feet above the existing utility pole or wireless telecommunications support structure on which it is being located. These regulations will minimize the impacts small cell facilities have on the City of Beacon and its residents.

The City Council believes that the local law will protect the health, safety and welfare of the City and its residents. For the reasons set forth above, the proposed action will not result in any significant adverse environmental impacts.
