concerning Small Cell Wireless Telecommunication Facilities”**

Short Environmental Assessment Form – Question #1

The purpose of the Local Law is to establish uniform policies and procedures for the deployment and installation of small cell wireless telecommunication facilities in the City of Beacon, which will provide a public health, safety and welfare benefit consistent with the preservation of the integrity, safe usage, and visual qualities in the City. The Local Law provides that no person shall install a small cell wireless telecommunication facility without first filing a small cell wireless telecommunications facility application and obtaining a small cell permit from the Planning Board. The Local Law sets forth locational priorities regulating where small cell wireless telecommunication facilities may be located to create the least amount of adverse aesthetic impacts and to preserve the scenic values of the City. The City hopes to preserve the character and integrity of City neighborhoods by the regulations set forth in the Local Law.

Part 3 Determination of Significance**

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

See attached.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

**“Local Law to create Chapter 223, Section 26.4 of the Code of the City of Beacon,
concerning Small Cell Wireless Telecommunication Facilities”**

The purpose of the Local Law is to establish uniform policies and procedures for the deployment and installation of small cell wireless telecommunication facilities in the City of Beacon, which will provide a public health, safety and welfare benefit consistent with the preservation of the integrity, safe usage, and visual qualities in the City. The Local Law provides that no person shall install a small cell wireless telecommunication facility without first filing a small cell wireless telecommunication facility application and obtaining a small cell permit from the Planning Board. The Local Law sets forth locational priorities regulating where small cell wireless telecommunication facilities may be located so as to create the least amount of adverse aesthetic impacts and to preserve the scenic values of the City. If a proposed small cell site is not located in a high priority location, then a detailed explanation must be provided explaining why a site of higher priority was not selected. Such high priority sites include roofs of any City owned or federal, state or local government owned buildings or structures. The applicant must satisfactorily demonstrate the reason or reasons why such a permit should be granted for the proposed site and the hardship that would be incurred by the applicant if the permit were not granted for the proposed use.

The regulations set forth in the Local Law will preserve the character and integrity of City neighborhoods. In its review of a small cell application, the Planning Board will consider all impacts to site lines and aesthetic views that may be affected by the installation of a small cell wireless telecommunication facility. The Planning Board will be able to evaluate each application to assess and minimize the impacts, and may condition any approval. The Local Law also prohibits the installation of new small cell facilities in the Historic District and Landmark Overlay Zone, and requires that all small cells placed on any roof shall be set back at least 15 feet from the edge of the roof along any street frontage.

The law also sets forth specific right-of way regulations and fees. All new utility pole or wireless support structures installed in the public right-of-way must be 50 feet in height or less. Furthermore, each new small cell wireless telecommunication facility, including antennas or other associated equipment, installed in the public right-of-way, may not exceed more than ten (10) feet above the existing utility pole or wireless telecommunication support structure on which it is being located. These regulations will minimize the impacts small cell facilities have on the City of Beacon and its residents.

The City Council believes that the local law will protect the health, safety and welfare of the City and its residents. For the reasons set forth above, the proposed action will not result in any significant adverse environmental impacts.
